

# The Power of Words

In the beginning was the word...

Words change your DNA sequences. They create quantum possibilities, allowing you control of your destiny.

This workshop will introduce ideas to consider as we become more aware of our speech.

Every day, we utter words. But how often do we pause to reflect on the words we choose and the impact they have on us and others?

Do our words strengthen - or weaken us?

Empower- or disempower? How can we tell?

During this workshop, you will have opportunities to 'switch on' your language through specific meditations, tools, and exercises and to realize your co-creation with the Divine.
